

TEAM SELECTION

SMAA

St Michael & All Angels Netball Club

Teams will be selected by a grading committee consisting of experienced club coaches including at least one committee member. The committee will determine the composition of the grading committee each season. The St Michael & All Angels Netball Club will endeavour to place a strong team in Division One in as many age groups as possible. Teams will be selected taking into account the following

- Ability
- Age Group
- Positions nominated to play
- Availability to attend trainings and games
- Past commitment and attitude at trainings and games

Selecting players out of their age group is not recommended, but will be considered by the selection committee on an individual basis.

Players playing out of their age group will be selected in an appropriate standard team, but will not take the place of a similar standard player playing in their age group, or displace a player already playing competitively at that level.

If the club does not have a team strong enough for players to play at the same or higher standard/division as last season, they may be considered to trial in the higher age group, with no restrictions.

Selection may occur based on nominations (where there are limited numbers in an age group) or through trials.

Consideration may be given to reciprocal friendships, requested on the nomination form at the beginning of each season. In cases where friendship requests are considered, players shall be graded on the ability of the lower division player. Only reciprocal friendship requests will be considered.

If a player cannot fully commit to trainings on the practice night/time determined by the coach and the club, then the player will be moved down into a team where they can train.

If a player withdraws their nomination after trialing and a refund is requested (with the exception of injury), an administration fee of \$50 will be retained by the club.
